Subject: Pre-Authorization Request – Aarav Sen (Policy: Plan A) – Secondary Insurer

Dear Claims Department,

I am writing to request pre-authorization for medically necessary surgical intervention for **Aarav Sen** (Policy: Plan A), as **secondary insurer** under coordination of benefits. The patient presents with a **complete ACL tear (Grade III, ICD-10: M23.619)** and **medial meniscus posterior horn tear (ICD-10: M23.200)**, confirmed by MRI (CPT 73721) on **10/06/2026**. The patient is currently **non-weight-bearing** with significant instability, necessitating urgent intervention to prevent further joint damage.

Proposed Procedures & Codes:

- **CPT 29888**: Arthroscopically aided ACL reconstruction (35,000 INR)
- **CPT 29881**: Arthroscopy, knee, with meniscectomy (10,000 INR)
- **CPT 99213**: Preoperative office visit (2,500 INR)
- **CPT 73721**: MRI (already performed; 3,000 INR)

Clinical Urgency: Delay risks chronic instability, cartilage degeneration, and long-term disability. Surgery is **time-sensitive** to optimize functional recovery.

As the **secondary insurer**, we kindly request your expedited review. Please confirm authorization or provide a determination **within 3–5 business days** to avoid treatment delays. Supporting documentation (MRI report, clinical notes) is attached.

Thank you for your prompt attention. For queries, contact [Your Name] at [Phone/Email].

Sincerely,

[Your Full Name]
