Subject: Pre-Authorization Request for Aarav Sen – Urgent ACL Reconstruction & Meniscectomy

Dear Claims Department,

I am writing to request pre-authorization for **Aarav Sen** (Policy: Plan B) for medically necessary knee surgery due to a **complete ACL tear (Grade III, ICD-10: M23.619)** and **medial meniscus posterior horn tear (ICD-10: M23.200)**, confirmed by MRI on **10/06/2026**. The patient is currently **non-weight-bearing** and requires urgent intervention to prevent further joint damage.

Proposed Procedures & Codes:

- **CPT 29888**: Arthroscopically aided ACL reconstruction (35,000 INR)
- **CPT 29881**: Arthroscopy, knee, with meniscectomy (10,000 INR)
- **CPT 99213**: Office visit (2,500 INR)
- **CPT 73721**: MRI lower extremity (3,000 INR)

Clinical Justification: The MRI demonstrates a **full-thickness ACL rupture** and **displaced meniscal tear**, necessitating surgical repair to restore stability and function. Delay may lead to chronic instability or early osteoarthritis.

As **Insurer2 (Plan B) is the PRIMARY insurer**, we kindly request expedited approval. Given the patient's **functional impairment**, we urge a response within **3–5 business days** to schedule surgery promptly.

Please confirm authorization or advise if additional documentation is required. Contact me at [Your Phone/Email] for further details.

Sincerely,
